

ENWIN: Working with Windsor to help you protect your property

DON'T FREEZE UP THIS WINTER

Cold weather can cause water pipes to burst and damage your home. Avoid frozen pipes and other costly repairs by preparing your home for winter:

- Disconnect hoses and winterize your exterior taps
- Insulate foundation openings and close crawl space vents
- Install plumbing in a heated space only
- Protect your water meter from weather damage
- Ensure your main water shut-off is accessible and it works
