

Don't Let Winter Freeze Your Pipes

As the frost sets in, it can cause water pipes to burst and damage your home. Don't let the cold catch you off guard — prepare your home with these simple tips and avoid costly repairs:

- Disconnect hoses and winterize your exterior taps
- Ensure your main water shut-off is accessible and working
- Insulate foundation cracks and openings
- Install plumbing in heated spaces only
- Close crawl space vents
- Protect your water meter from weather damage
