

**PUBLIC INFORMATION CENTRE
COMMENT FORM**

ENWIN Utilities Ltd. (ENWIN) on behalf of the Windsor Utilities Commission (WUC) is undertaking a Schedule 'B' Municipal Class Environmental Assessment (Class EA) for a new Elevated Water Tower and associated distribution and transmission system. The purpose of this Class EA is to determine a long-term solution to maintain adequate water supply and operating pressure to the service area.

This study will include review of background information, definition of the problem statement and evaluation of alternative solutions. The assessment will include consideration for potential environmental, social, and economic impacts as well as measures to mitigate adverse impacts.

THANK YOU

Public participation will form an integral part of this Class EA study to ensure that the concerns of the public and affected groups within the study area are identified, documented, and assessed. Thank you for your interest in this project and attendance at this public information centre.

Copies of the Public Information Centre material are available on Enwin's website below:
