Tree trimming is scheduled in your neighbourhood

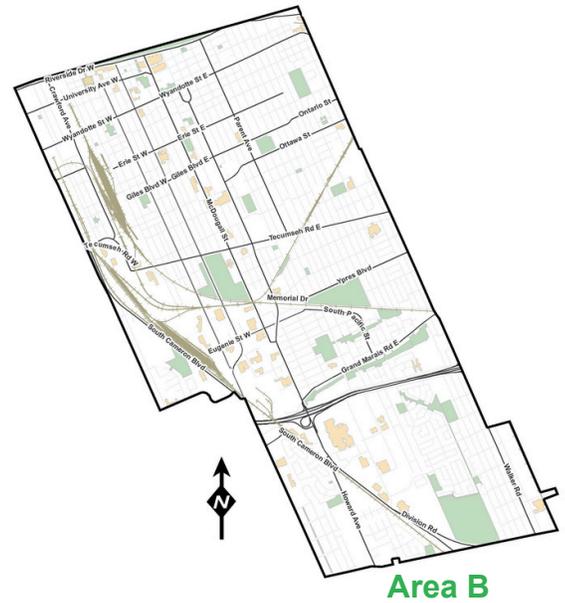

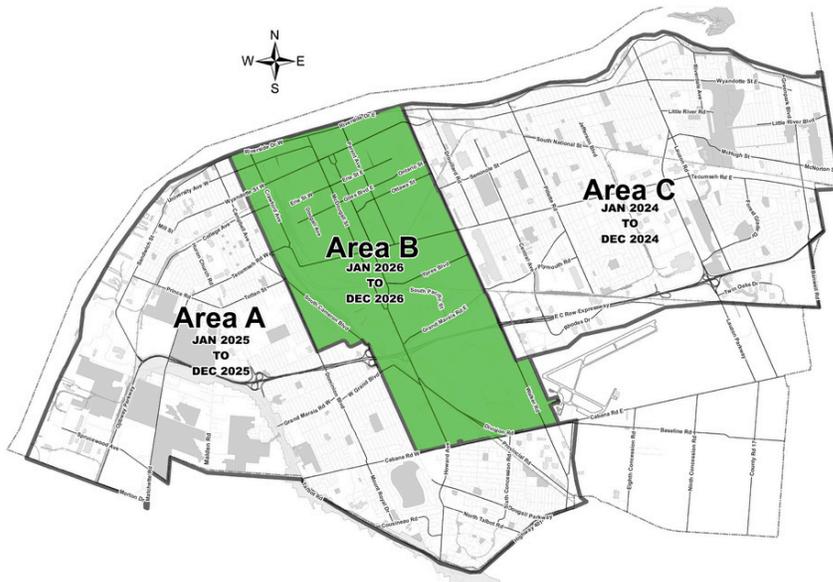

Fallen tree branches cause one out of every three power outages in Windsor

ENWIN has contracted Davey Tree, professional arborists, to keep our electrical infrastructure safe by trimming trees near power lines in Windsor. This proactive approach helps prevent potential power interruptions caused by falling tree branches and reduces electrical safety risks for our community.

This year, Davey Tree is trimming trees in **Area B**, as highlighted in the map below. **Area B** includes City of Windsor properties located:

- East of Dominion Boulevard
- North of Cabana Road East
- West of Walker Road including Riberdy Road
- South of Riverside Drive East

If your property is in **Area B**, Davey Tree may need to access your property to complete tree trimming. This essential maintenance helps ensure reliable electrical service and protects both trees and power infrastructure.

Stay informed of potential service disruptions

During tree trimming, for your safety and the safety of the tree-trimming team, ENWIN may need to briefly interrupt your electrical service. If your service will be impacted, ENWIN will make every effort to notify you in advance by phone with the outage date, time, and expected duration. Keep your contact information up to date using myENWIN at <https://my.enwin.com/>.

For more information, please call Davey Tree at **519-739-1378** or visit www.daveytree.ca.
